

Practical No. 06

PAGE NO. :

DATE: / /

★ Dim: Write a code to create a web-page including Image tag with height and weight and also used for background image.

★ Theory:

Image Tag - The image tag is used to embed an image in an HTML page.

Images are not technically inserted into a web-page; images are linked to web pages. The `` tag creates a holding space for the referenced image.

The `` tag has two required attributes:

- `src` - Specifies the path to the image.
- `alt` - Specifies an alternate text for the image, if the image for some reason cannot be displayed.

★ Code:

```
<!DOCTYPE html>
```

```
<html>
```

```
  <head>
```

```
    <meta charset="utf-8">
```

```
    <meta name="description" content="img">
```

```
    <title>Practical 6</title>
```

```
  </head>
```

```
<body style="background-image: url('astronomy.png');  
background-repeat: no-repeat;  
background-size: cover;">  
  
</body>  
</html>
```

* Conclusion:

In this practical I've learned about image tag and its attribute and ^{about} background image.

Practical No. 07

- * Ques: Design web page include image with different alignments and wrapped text in and also ~~used~~ for background image link the image in web page.

* Theory:

Text wrapping: The wrap attribute specifies how the text area is to be wrapped when submitted in a form.

Hyperlinking: A hyperlink is a simple is a reference to data that the user can follow by clicking or tapping. A hyperlink points to whole document or to a specific element with a document. Hypertext is a text with hyperlink.

* Code:

```
<!DOCTYPE html>
```

```
<html>
```

```
  <head>
```

```
    <meta charset = "utf-8">
```

```
    <meta name = "description" contents = "list alignments">
```

```
    <title> Practical 7 </title>
```

```
  </head>
```

Alignment and Wrapping

Uchihas are the best.  vertical-align:top.

Uchihas are the best.  vertical-align:middle.

Uchihas are the best.  vertical-align:bottom.

 Uchihas are the best. float: left.

s Uchihas are the best. float: right. 

```
<body>
```

```
<h2> alignment and wrapping </h2>
```

```
<p style="margin-left: 25px;">
```

```
Uchihai are the best.   
vertical-align: top. <br><br>
```

```
Uchihai are the best.   
vertical-align: middle. <br><br>
```

```
Uchihai are the best.   
vertical-align: bottom. <br><br><br>
```

```
Uchihai are the best.   
float: left <br><br><br>
```

```
Uchihai are the best.   
float: right <br>
```

```
</p>
```

```
</body>
```

```
</html>
```

* Conclusion:

In this practical we've learned about alignment of images and text wrapping around images.
