### GOVERNMENT POLYTECHNIC, NAGPUR.

(An Autonomous Institute of Govt. of Maharashtra)

### **COURSE CURRICULUM**

PROGRAMME : DIPLOMA IN INFORMATION TECHNOLOGY

LEVEL NAME : PROFESSIONAL COURSES

COURSE CODE : IT405E

COURSE TITLE : NETWORK ADMINISTRATION AND SECURITY

PREREQUISITE : Nil

TEACHING SCHEME: TH: 03; TU: 00; PR: 04(CLOCK HRs.)

TOTAL CREDITS : 05 (1 TH/TU CREDIT = 1 CLOCK HR., 1 PR CREDIT = 2 CLOCK HR.)

TH. TEE : 03 HRs

PR. TEE : 02 HRs (Internal)

PT : 01 HR

#### **\*** RATIONALE:

Engineering students must be able to use basics of computer and its security in real time environment. This course increases student's ability towards troubleshooting the problems occurred regarding security of computer and its network. It also describes basics of attacks occurred over the computer in the network. This subject is network application based subject. It gives the practical knowledge of designing computer network while using any type of topologies. This subject covers the installation and configuration of any network operating system. With the proper configuration of operating system on the server, the students will manage and administer the network resources or devices such as printers, scanner, driver and also software like files, folders, directories, applications, programs etc.

#### **\*** COURSE OUTCOMES:

#### After completing this course students will be able to-

- 1. Justify the solutions for real world problems regarding security of computer.
- 2. Design the computer network.
- 3. Configure the networking resources and software from the server.
- 4. Troubleshoot network devices in the case of breakdown.
- 5. Use the different types of network technologies for internet connection.
- 6. Identify and repair the network faults

### B. LIST OF PRACTICALS/LABORATORY EXPERIENCES/ASSIGNMENTS:

<b>Practicals</b>	Specific Learning Outcomes (Psychomotor Domain)	Units	Hrs.
1.	Install Linux server and analyze networking features of Linux	Security	04
2.	Install and configure DNS on Linux	Alerts	04
3.	Perform access control work on Linux	Security in	04
4.	Configuration of Firewalls on Linux	Network	04
5.	Install Windows 2003 Server and note its important features	Administering Windows 2003 Server	04
6.	Write the steps for Creating AD Object and perform it on Windows 2003	Designing	02
7.	Create New users in Windows 2003 server and assign different privileges to them	Network	02
8.	Create Windows 2003 Server Boot Disk required for the installation		04
9.	Install Active Directory in windows 2003 server platform	Administarina	04
10.	Write the steps required for the installation of a Local printer in Windows 2003 server environment, and also test this installation from the another PC	Administering Windows 2003 Server	02
11.	Write the steps required for the installation of a Network printer in Windows 2003 server environment, and also test this installation from the another PC		04
12.	Install Hardware Firewall and configure it for its optimum utilization		04
13.	Install UTM (Unified Threat Management) and configure it for its optimum utilization	Security Alerts	04
14.	Identify the performance of cryptography work on Windows for encryption		04
15.	Prepare a report on Latest Networking Technology in use.	-	12
